The challenge of genetic change in animal production

Contents

Programme i
Foreword iii
Delegates iv

INVITED PAPERS
J C McKay, N F Barton, A N M Koerhuis & J McAdam 1
The challenge of genetic change in the broiler chicken

J W M Merks 8
One century of genetic changes in pigs and the future needs

R Preisinger & D K Flock 20
Genetic changes in layer breeding: Historical trends and future prospects

B McGuirk 29
Genetic changes in ruminants: Historic trends and future prospects

G C Emmans & I Kyriazakis 39
Issues arising from genetic selection for growth and body composition characteristics in poultry and pigs

S Tamminga 53
Issues arising from genetic change: Ruminants

H L Classen 63
Managing metabolic disease in rapidly growing strains of poultry

P W Knap & S C Bishop 65
Relationships between genetic change and infectious disease in domestic livestock

A B Lawrence, J E Pryce and A Stott 81
Animal welfare and public perceptions as potential constraints to genetic change in animal production

POSTER PRESENTATIONS
H N Kadarmideen, R Thompson & G Simm 83
Linear and threshold model genetic parameters for disease, fertility and milk production in dairy cattle

A Cahaner & N Deeb 85
Reduced heat tolerance in fast-growing broilers
