

# Sustainable Land Management Policies

**MSc course for students of International Land and Water Management**

**Objective: gain insight into policies and reflect on their influence on SLM**

**Three Cases / 4 weeks:**

1. Olive farming and EU policies
2. UNCCD policies
3. Pesticide use and policies

**+ Individual Assignment / 1 week**

# Sustainable Land Management Policies

1. Chose a certain country:
  - inventory of SLM policies in a specific country
  - rural development policies, land use policies, subsidies, etc.
  - analyse their influence on land management (decisions)
  - e.g. China, Afghanistan, Grenada

2. Chose a certain commodity:
  - inventory of (land management) policies for this commodity
  - study the impact of these policies on sustainable land management
  - e.g. coffee and fair trade policies
  - e.g. pesticide use in Uruguay
  - e.g. forestry in Estonia
